Zebra QLn 420 Series

IVDT On-Board Printers: Records and Receipts on the Go

Many businesses especially those that deploy lift trucks in fast paced environments often rely on IVDT systems to provide notifications such as weight or shipment totals. IVDT takes into account that driving a lift truck alone is a tedious endeavour that demands focus therefore requires full attentions. With the addition of a printer and the push of a button there is no need to manually record totals thus eliminating dangerous interruptions and mistakes caused by human error. All mobile printers available from IVDT Inc. that can be used with SkidWeigh products have either RS-232 or Bluetooth compatible communication connection.
