LOAD CAPACITY MONITOR

IC Trucks

Load Capacity Monitor In %

Application for all kinds of IC material handling vehicles regardless of the vehicle make, model, lift capacity or operating voltage.

- Digital indicator, large six digit LED display, low temperature version
- Strobe light, ultra bright red indicator and audio alert for vehicle overload
- Two pushbuttons automatic calibration for load % function calibration
- Optional two % channels
- Compact size
- Hydraulic pressure transducer
- Relay for external optional overload alert warning, dry contacts SPDT
- Operating voltage from 12 to 55 VDC
- Load weighing accuracy shown in % of maximum vehicle lift capacity is 0.5 % to 1.0 %

Order No. ICT-LCM
