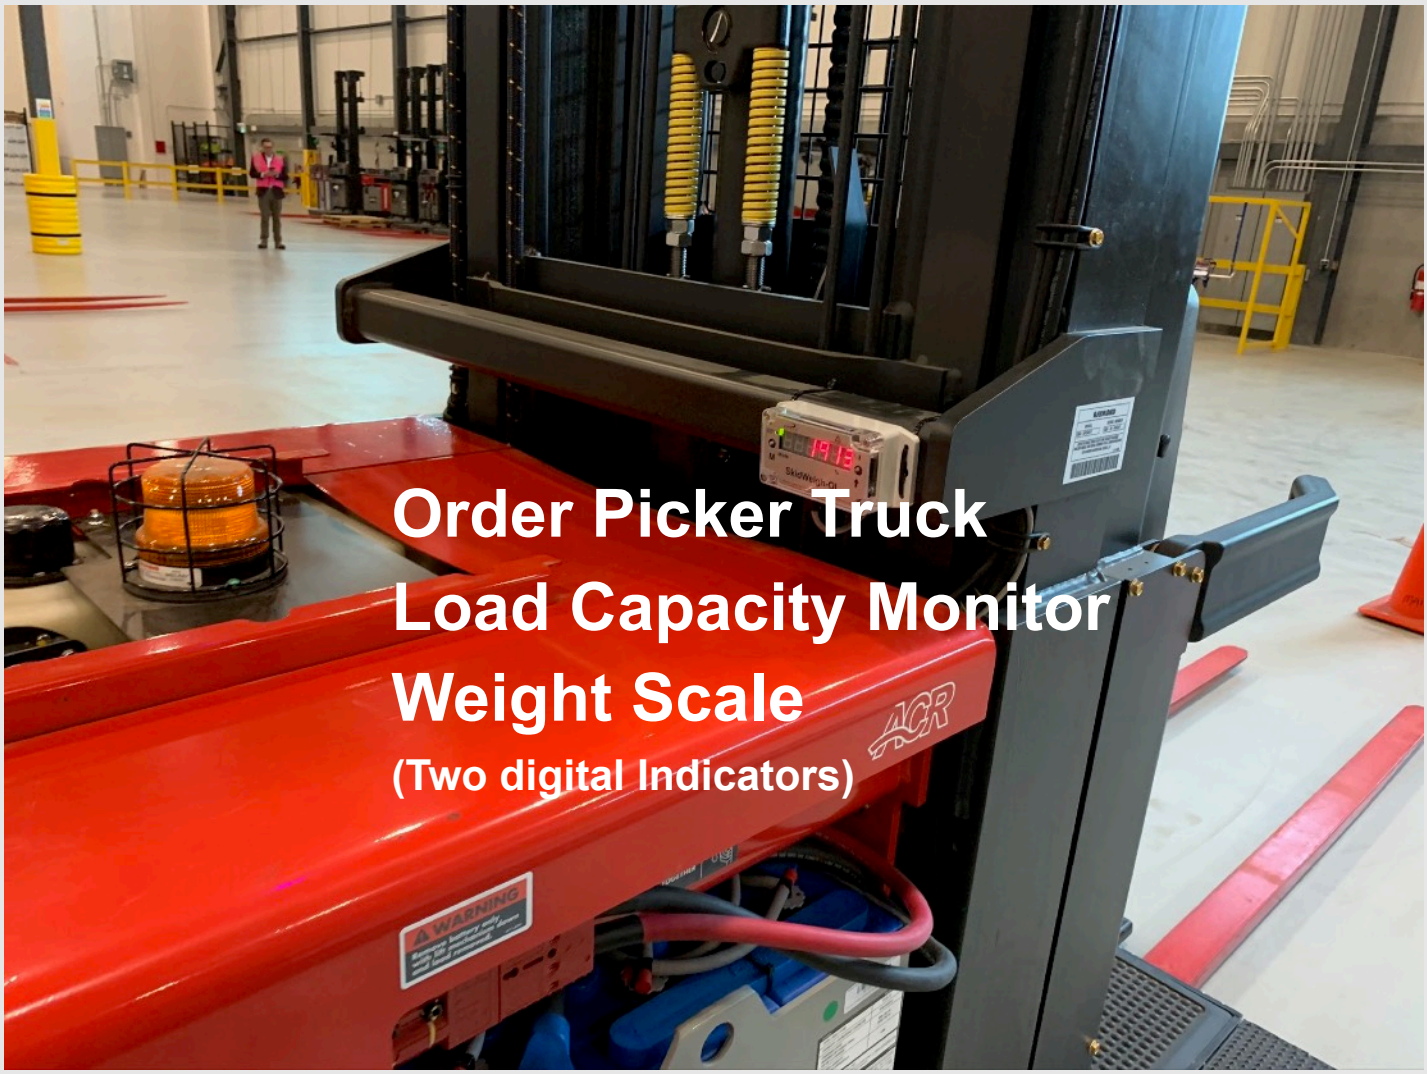
OP-LCM-W

LOAD WEIGHT SCALE



- Master digital indicator,(System calibration and setup) large six digit LED display, low temperature version
- Slave digital indicator, (Installed on moving platform for operator view) large six digit LED display, low temperature version
- Bluetooth module to communicate from master to slave digital indicator
- Automatic Bluetooth pairing from master to slave digital indicator
- Internal audio overload alert
- Bluetooth LED light
- Ready / BusyLED light
- Two pushbuttons automatic calibration on master digital indicator for load weighing function calibration
- Optional two weighing channels
- Compact size
- Hydraulic pressure transducer
- Relay for external overload warning alert, dry contacts SPDT
- Load weighing accuracy from 0.5% to 1.0 % of maximum vehicle lift capacity
- Operating voltage from 12 to 55 VDC
