Electric Pallet Truck Scales, EP series

For years finding an accurate and affordable solution to capture load weight on electric pallet truck has been an industry challenge. Load cell systems often cost more than vehicle itself and in most cases to install one of the aftermarket supplier is not recommended by the OEM.

The ED3-EP series is designed specifically for use with class III electric pallet truck having lift accurate technology software algorithm utilizing the hydraulic pressure transducer. Easy retrofit to any vehicle system installs in two hours or less.

Optional data output capabilities includes USB port, onboard printer.

Order Number	Functions
ED3-EP1	Weighing scale
ED3-EP2	Weighing scale with accumulative load weight total
ED3-EP3	Weighing scale with USB port
ED3-EP4	Weighing scale with accumulative load weight total with USB port
